TODAY'S TMJ4 WEATHER PLUS 5-DAY OUTLOOK

WEDNESDAY

-4° 13°

Mostly sunny and cold.
Wind: WNW 10-20

THURSDAY

-2° 16°

Mostly sunny and still very cold

FRIDAY

2° 16°

Partly cloudy and cold

SATURDAY

4° 15°

Sunny but still cold and dry

SUNDAY

4° 17°

Still sunny and cold

WEATHER PLUS

In '77, lake froze shore to shore

The bitter arctic air has moved east, but chilly conditions will still prevail across most of Wisconsin. Look for high temperatures mainly in the teens for today and the rest of the week with overnight lows below zero in most locations. The upper air pattern is also rather quiet from the west-northwest, so there are no major snowstorms in sight for Wisconsin.

Today is the anniversary of the third time since the beginning of the 20th century that Lake Michigan completely froze over from shore to shore. This cold winter occurred in 1976-'77 and was the beginning of three very bitterly cold winter seasons for Wisconsin. The fourth and last time Lake Michigan froze over 100% occurred in the third of these winters, on Feb. 18, 1979. The other two years that the lake froze over completely were 1936 and 1963.

The 1970s were very cold and one of the snowiest decades in Milwaukee. Tuesday was the anniversary of a major three-day snowstorm in the Milwaukee area that brought a total of 23.6 inches to the city. Compared with other recent decades, the 1970s recorded more overnight temperatures that dropped to or fell below zero. During the 1970s, 138 days fell below zero, compared with 113 in the 1980s and only 54 days in the 1990s.
